TIME IT

Your project implementation under control!

Upon implementing new software or changes in the infrastructure, functionally as well as technically, you want to control the situation completely.
The realisation of an upgrade or implementation often takes place according to a release plan. Specifically, managing this process has up to now been impossible or difficult to run, or as the case may be, control. For this purpose there now is an adequate solution available.

Because, whether it deals with implementing a new system, applications in your company, or remodelling your home, the groundwork is the same. Up to now, managing this process had been difficult to control. It was time consuming, a lot went wrong, and you operated mainly by intuition. Through that you were frequently confronted with unexpected, unpleasant surprises.
Time IT focus itself on a tight time-oriented change process, which progresses according to a release plan and where many variables play a part.

You really want to keep a finger on the pulse. You need to pass through the necessary operation steps in a controlled and safe manner. You have to monitor progress and communicate transparently with all the parties involved. You really only want to be and stay in control!

Time IT is a powerful instrument you can use to pass through all the process steps of an implementation trajectory in a controlled and safe manner. With Time IT in real time you easily control the progress of all activities via all sorts of communication devices, such as SMS and/or email. Planning and production are approached appropriately so that you can work quickly and be more flexible.

Time IT is a product, developed on the basis of many years of practical experience in for profit as well as non profit organisations. We have learned that successful achievement is largely dependent on good preparation and a thorough implementation and communication plan. With Time IT you manage the progress of the activities in real time. Planning and production are approached appropriately so that you can react more rapidly when changes occur.
Time IT is simple to use and easy to learn because it is based on applications that you are already familiar with. Time IT helps to improve your productivity and push back implementation costs.

Time IT helps to perform your implementations on the basis of previously planned activities. If a change takes place in the scenario, Time IT shall automatically update the script. Intuitive tools

---

ensure that your employees can convert instructions into tangible results. With Time IT the implementation team reports progress without problems so that, at all times you keep an eye on the actual status of the work, irrespective of your location.
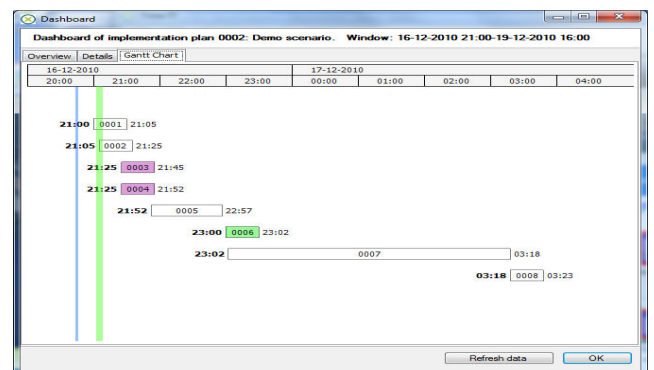

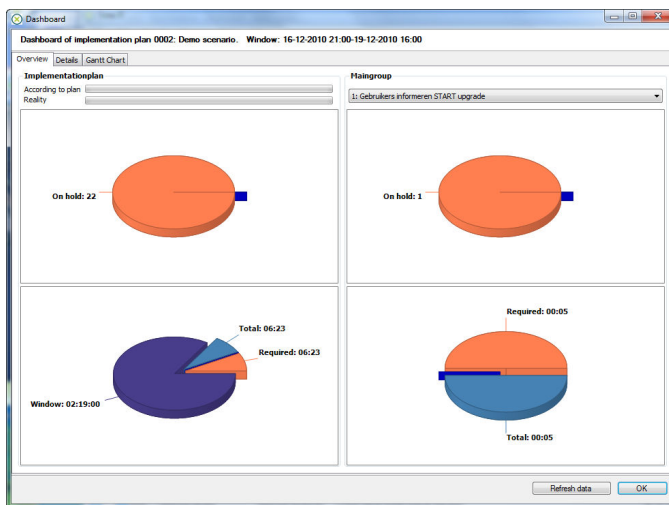

With Time IT you and your employees work together online. By applying Time IT one is forced to think about the necessary resources, these being people and requisites, their dependencies, planning and production time aspects.

Via a PC, laptop, PDA, or Smartphone, you are informed about the progress of the activities at any desired moment. With Time IT, the number of meetings is reduced to a minimum, and you'll save on travel costs. Time IT offers you the advantages of better decision making and greater flexibility.

Due to a thorough preparation with all the people involved, you'll save production time and thus also costs during implementation.

During preparation, the necessary steps are namely described in a detailed way, resources are planned, and the thereto pertaining parts of the various teams are recorded. Time IT supports you in the preparation and implementation via orderly planning, communication and continuation functions.
